

Appln. No. 09/875,998

Docket No. 35-0016

**Amendment to the Specification**

Please amend the abstract, which appears on page 13, as follows:

A software tool development system, including 400 ~~is provided~~. ~~The software tool development system 400~~ includes a customer segment 410 relaying tool requirements 413 to a tool provider segment 420 and a tool provider segment 420 generating a custom software tool 427 based on the tool requirements 413. The custom software tool 427 is then stored on a remote server 432 ~~accessible from~~ by the customer segment 410. ~~The users 416 at~~ Users in the customer segment 410 access the custom tool 434 and store data on ~~at~~ the remote server 432. Additionally, when a user 416 completes a project element, the project element may be placed in a "to approve" database on ~~at~~ the remote server 432 for review by an approver in ~~at~~ the customer segment 410. Once a project element has been approved, the project element may be moved to a project database on ~~at~~ the remote server 432.
